## SPUHR IDEAL CHASSIS SYSTEM™ (SICS™)

**Löddeköpinge, Sweden (September 6, 2021)** – Spuhr i Dalby AB (Spuhr®) is introducing the **Spuhr Ideal Chassis System™ (SICS™)** to the North American market.

Mr. Ulf Nilsson, CEO, says, “This is a project we’re extremely proud of. The Spuhr Ideal Chassis system, or ‘6’ for short, has been the company’s main focus for the past 18 months. The SICS™ was designed around the concepts of modularity, stability, innovation, and quality.”

Integrating the Spuhr Interface™ into a chassis system allows the user to position accessories originally designed for the Spuhr Ideal Scope Mount System™ (ISMS™) at various positions on the rifle system, combined with an exchangeable handguard and bag rider, provides unsurpassed modularity.

Machined from aircraft aluminum, with the sole synthetic parts being the rubberized pistol grip, cheek piece, and a *Limbsaver® Airtech®* recoil pad, the SICS™ offers an extremely rigid shooting platform.

An innovative, and patented, quick-adjustable Length of Pull (LOP) allows the user to instantly adjust the LOP when shifting from one shooting position to another. The SICS™ also features *LOP Presets* so that the user can tailor his maximum and minimum Length of Pull. Integrated into the standard 16-inch forend is an *Arca Swiss®* rail for use with bipods and tripods, but even this part of the chassis still accepts Spuhr Interface™ accessories.

As always, quality has been a priority, where the SICS™ does not feature any sharp edges while featuring the same high quality black anodizing known from the Spuhr Hunting Series mounts and rings (other colors will be available.)

The first versions released will be for the Remington 700 and Tikka T3/T3x short action footprints, for use with AICS magazines. Pre-orders for the North American market will be accepted starting September 27<sup>th</sup>.

### **About Spuhr i Dalby AB**

Spuhr i Dalby AB (Spuhr®) was founded in 2007 by Håkan Spuhr to design and manufacture advanced mounting solutions and weapon upgrade kits for elite military, police, and civilian customers. Best known for their Ideal Scope Mount System™ (ISMS™,) an innovative and market-changing approach to optics attachment, Spuhr® is a market-leading Swedish manufacturer of optics mounts and weapon upgrade kits, such as their adjustable G3 and MP5 stocks, to law-enforcement and military units around the world.
